

# CESAR FONSECA

## FULL STACK DEVELOPER

+2 Years on React.js/Next.js and Express.js with TypeScript. I have been a team leader and responsible for implementations for clients around the world, especially for clients with funnels and ad campaigns with high traffic. My experience is based on the long-term development of a platform that will help out the owners of funnels to invest less time setup different platforms and have everything in the same place.

## MOST RECENT WORK EXPERIENCE

### Full stack and Development Team Leader at Growth Kingdom

January 2021 to Present · 2 years ago

Chihuahua, Mexico

#### RESPONSIBILITIES

- Develop and maintain a web application that unifies all the services offered to our clients
- AWS EC2 & RDS
- Rest APIs
- CI/CD
- MySQL administration
- Client-side with Nextjs
- Linux server administration

#### KEY ACCOMPLISHMENTS

- Improvement in the scheduling of prospects for clients, they could schedule more with fewer configurations
- Unification of several processes carried out by hand, normally to be able to schedule a user we should use TypeForm, with the tool under development we track, administer and manage the financial status of bookings/leads/prospects

### Front end developer at Freelancer

January 2020 to December 2021

Cundinamarca, Colombia

#### RESPONSIBILITIES

- Create dynamic and static websites, management of hosting, domains, and databases finalizing the correct implementation on the front end side

## KEY ACCOMPLISHMENTS

- Several sites for companies, landing pages most of all
- An entry of small companies to the web world generating sales and consolidating new clients for the services offered
- Improvement in outdated systems, change of technologies from wordpress to custom sites

## SKILLS

- React.js
- Next.js
- Express.js
- MySQL
- AWS EC2 & RDS
